Art Unit:

I. Claim Rejection under 35 USC 103(a) according to Valcke et al will be maintained in light of amendment filed 5/7/01 for reasons on record and reasons as follows. New claim 17 is added to this rejection. Valcke suggests the non aqueous emulsifiable concentrate of the instant invention. The instant carbon chain length of the alkoxyated alcohols as well as the instant amounts/ratios of ingredients would have been determined during routine experimentation. A statement to the intended use for the concentrate has no patentable significance in a claim drawn to a concentrate or composition.
